Sabari Giri M

+91 9080965420 | sabarigirisabarigiri64@gmail.com | LinkedIn | GitHub | LeetCode

Objective

Software Engineer specializing in Java and Spring Boot, with comprehensive expertise across MySQL and MongoDB, and full-stack capabilities in React, JavaScript, and HTML5/CSS3. Adept at architecting scalable backend systems, developing secure RESTful APIs, and delivering responsive end-to-end web applications. Combines strong fundamentals in Data Structures and Object-Oriented Programming with a commitment to building clean, maintainable, and high-performance software solutions.

Education

Bachelor of Technology in Information Technology 2023 – 2027
K.S. Rangasamy College of Technology, Tiruchengode
CGPA: 8.4/10

Higher Secondary Education (HSC) 2022 – 2023
Jayarani Matric Higher Secondary School
Percentage: 81%

Experience

Fox Three Technologies Aug 2026 – Sep 2026
Java Full Stack Developer Intern – 45 Days *On-Site*

- Built and tested web applications modules by integrating frontend interfaces(HTML, CSS, JS) with java Spring Boot backend services.
- Implemented CRUD operations and developed RESTful APIs to establish seamless communication between frontend components and the SQL database.
- Utilized Postman for rigorous API testing and Git/GitHub for version control, successfully resolving UI rending and database connection issues.

Eduskill Jan 2026 – Mar 2026
Java Full Stack Developer Intern – 10 Weeks *Remote*

- Completed a certified 8-week virtual internship focusing on Java Full Stack Development.
- Acquired practical expertise in client-side rendering, backend data processing, and relational database integration leveraging Core Java principles.

Projects

Skill Match AI | *React, Java Spring Boot, MongoDB, Generative AI*

- Built a full-stack platform in React and Spring Boot, analyzing resumes against job descriptions for ATS match scoring.
- Engineered an automated resume parsing pipeline to extract candidate skills, experience, and education using AI.
- Integrated Google Gemini AI via REST APIs to detect skill gaps and generate personalized weekly learning roadmaps.
- Developed an AI mock interview and assessment engine providing role-specific technical questions with real-time feedback.
- Structured a scalable MongoDB schema to store AI-generated JSON data, utilizing Spring Security (JWT) for authentication.

AI Policy Simplifier & Risk Detector| *Python, Streamlit, OpenAI API*

- Developed a Streamlit platform in Python to analyze legal documents and simplify regulatory jargon.
- Implemented a Scikit-learn TF-IDF model to categorize contract risks into High, Medium, and Low severity.
- Integrated NLTK tokenization and TextBlob sentiment analysis to detect anomalous clauses and flag unfair legal terms.
- Built a multi-lingual audio pipeline using Deep-Translator and gTTS to deliver translated, voice-synthesized policy summaries.
- Engineered interactive Plotly analytics dashboards with Pandas to dynamically visualize risk distributions, metrics, and text lengths.

Technical Skills

Languages: Java, Python, SQL
Frontend: HTML, CSS, Bootstrap, JavaScript, React.js
Backend: Java, Spring Boot, Node.js, RESTful APIs
Database: MySQL, MongoDB
Cloud / Tools: Git, GitHub, VS Code, Postman
Core Concepts: Object-Oriented Programming (OOP), DBMS, Operating Systems, Data Structures and Algorithms

Certifications

- Oracle Cloud Infrastructure – Generative AI Professional & AI Foundation Associate
- Infosys Springboard – Java, Python, AngularJS, DBMS
- NPTEL – Human-Computer Interfaces; Privacy and Security in Online Social Media
